

LBT-3

The Blast-It-All® LTB-3, is a stand alone, tumble basket that offers batch processing for smaller parts. This method of batch tumble blasting offers a continuous air blasting for up to fifteen lbs. of small parts. Batch processing offers a great return on investment, because of the labor saving.

Designed for simple operation: load the parts, close and latch door, and set timer. This unit comes standard with a #4 blast gun including a tungsten carbide nozzle. Our #4 gun will require 16 CFM, when the pressure regulator is set to 70 PSI. The door has a plate, that will cover the basket when the door is closed, to help prevent parts from being blown out of the basket. The LTB-3 can be used with GLASS BEADS OR ALUMINUM OXIDE. This system comes standard with a 300 CFM reclaim with a dust bag after filter.

BLAST-IT-ALL® Salisbury, NC 28145 (800) 535-2612 www.blast-it-all.com sales@blast-it-all.com

Includes:

Motor: 1/2 HP, 120 volts, 11 amp, 3450 rpm, switch controlled.

Reclaimer: High performance 300 CFM cyclone type reclaimer separates good media from dust and by-products.

Dust Collector: Cotton sateen dust bag collects dust from reclaimer. Zipper in bottom for emptying dust and debris.

Fill Door: To add media to machine and remove debris from debris screen basket inside reclaimer, adjustable air intake on door.

Media Valve: Universal feed allowing all types of abrasives to be used. 2" drain plug outlet for easy clean-out.

Media Hose: 1/2" media line hose from reclaimer media valve to bottom fitting on blast gun.

Sump Hose: 4" flexible duct hose, from machine sump outlet to reclaimer inlet.

Door Opening: Large 13" wide x 15" tall opening. For easy removable and replacing tumble basket.

Switch: When door is closed and switch contact striker makes contact, the timer becomes operational. Blast gun and tumbler rotation will start.

Timer: Set timer switch to desired minutes for blast action and tumbler rotation. 0-30 minutes.

Gauge: Shows desired gun air pressure.

Tumble Basket: Large 10" x 10" basket. May be removed for easy loading and unloading. 15 pounds capacity. 3/16 Holes.

Basket Cover: Cover Attached to Door, Covers Basket When Door Closed.

Air Flow Regulator: Allows adjustable air pressure to gun for proper media flow to provide finish desired.

Airline Filter: 1/2" NPT Intermediate Filter

Blast Gun Mount: Blast gun is mounted and directed into basket to a desired position.

Switch Contact Striker: Makes contact with switch (#9) to start blast action.

Door Latch: Heavy duty positive cam type, adjustable for complete door seal.

Gasket: Large 1" wide x 1/2" thick gasket to provide a leak proof seal with cabinet knife edge.

Sump Outlet: Flexible duct hose connection.
